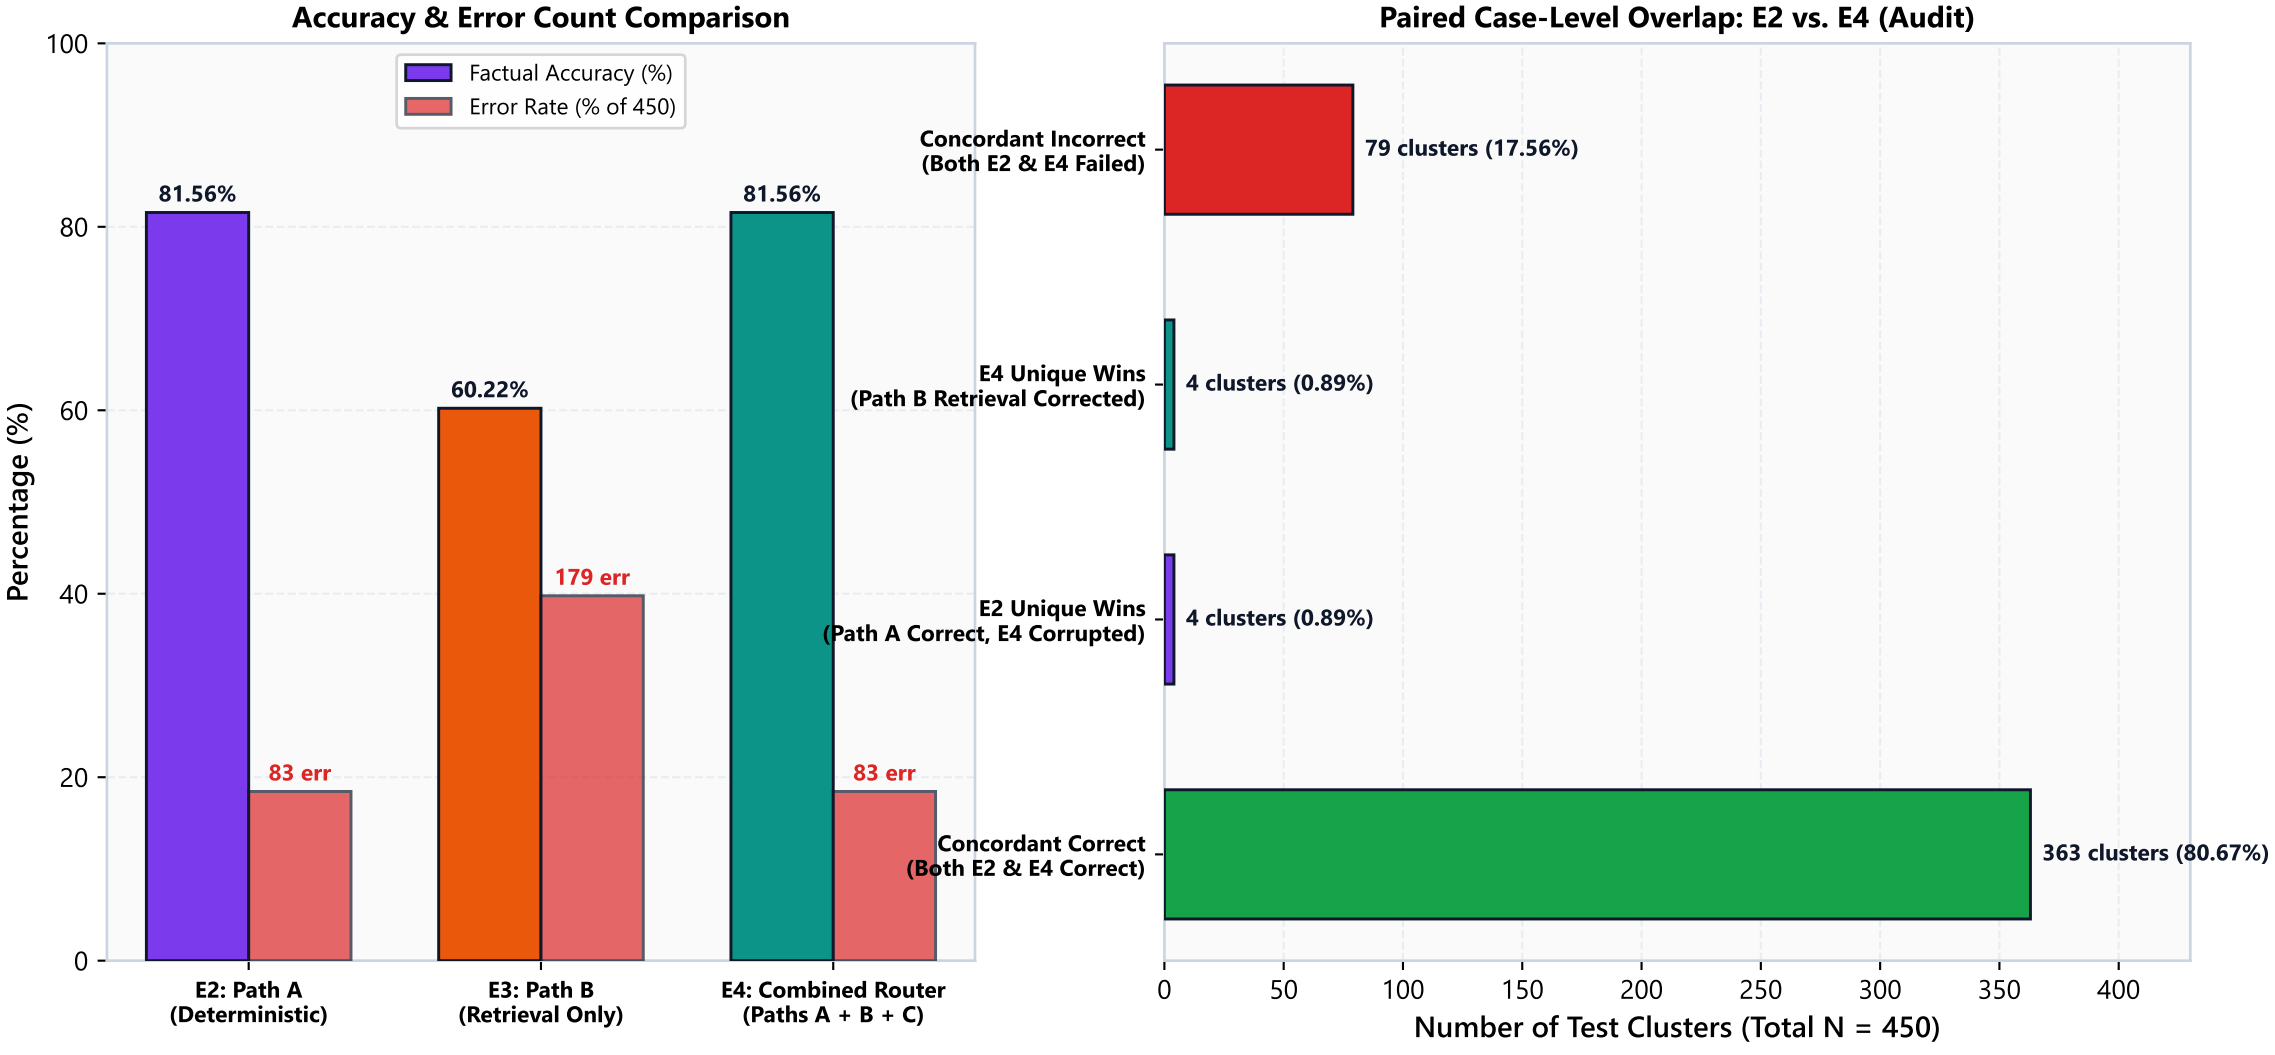

Figure 6: Deterministic Verification (Path A) versus External Retrieval (Path B)
Resolving the Reported Parity (81.56%): E2 and E4 Trade Exactly 4 Distinct Wins and Losses in Entity Relations

Key Forensic Finding: E2 and E4 share the same overall accuracy (367/450), but differ in 8 clusters:
Path B successfully corrected 4 entity hallucinations (p6_s06_ent_019, 029, 039, 049) while corrupting 4 others (015, 025, 035, 045).
