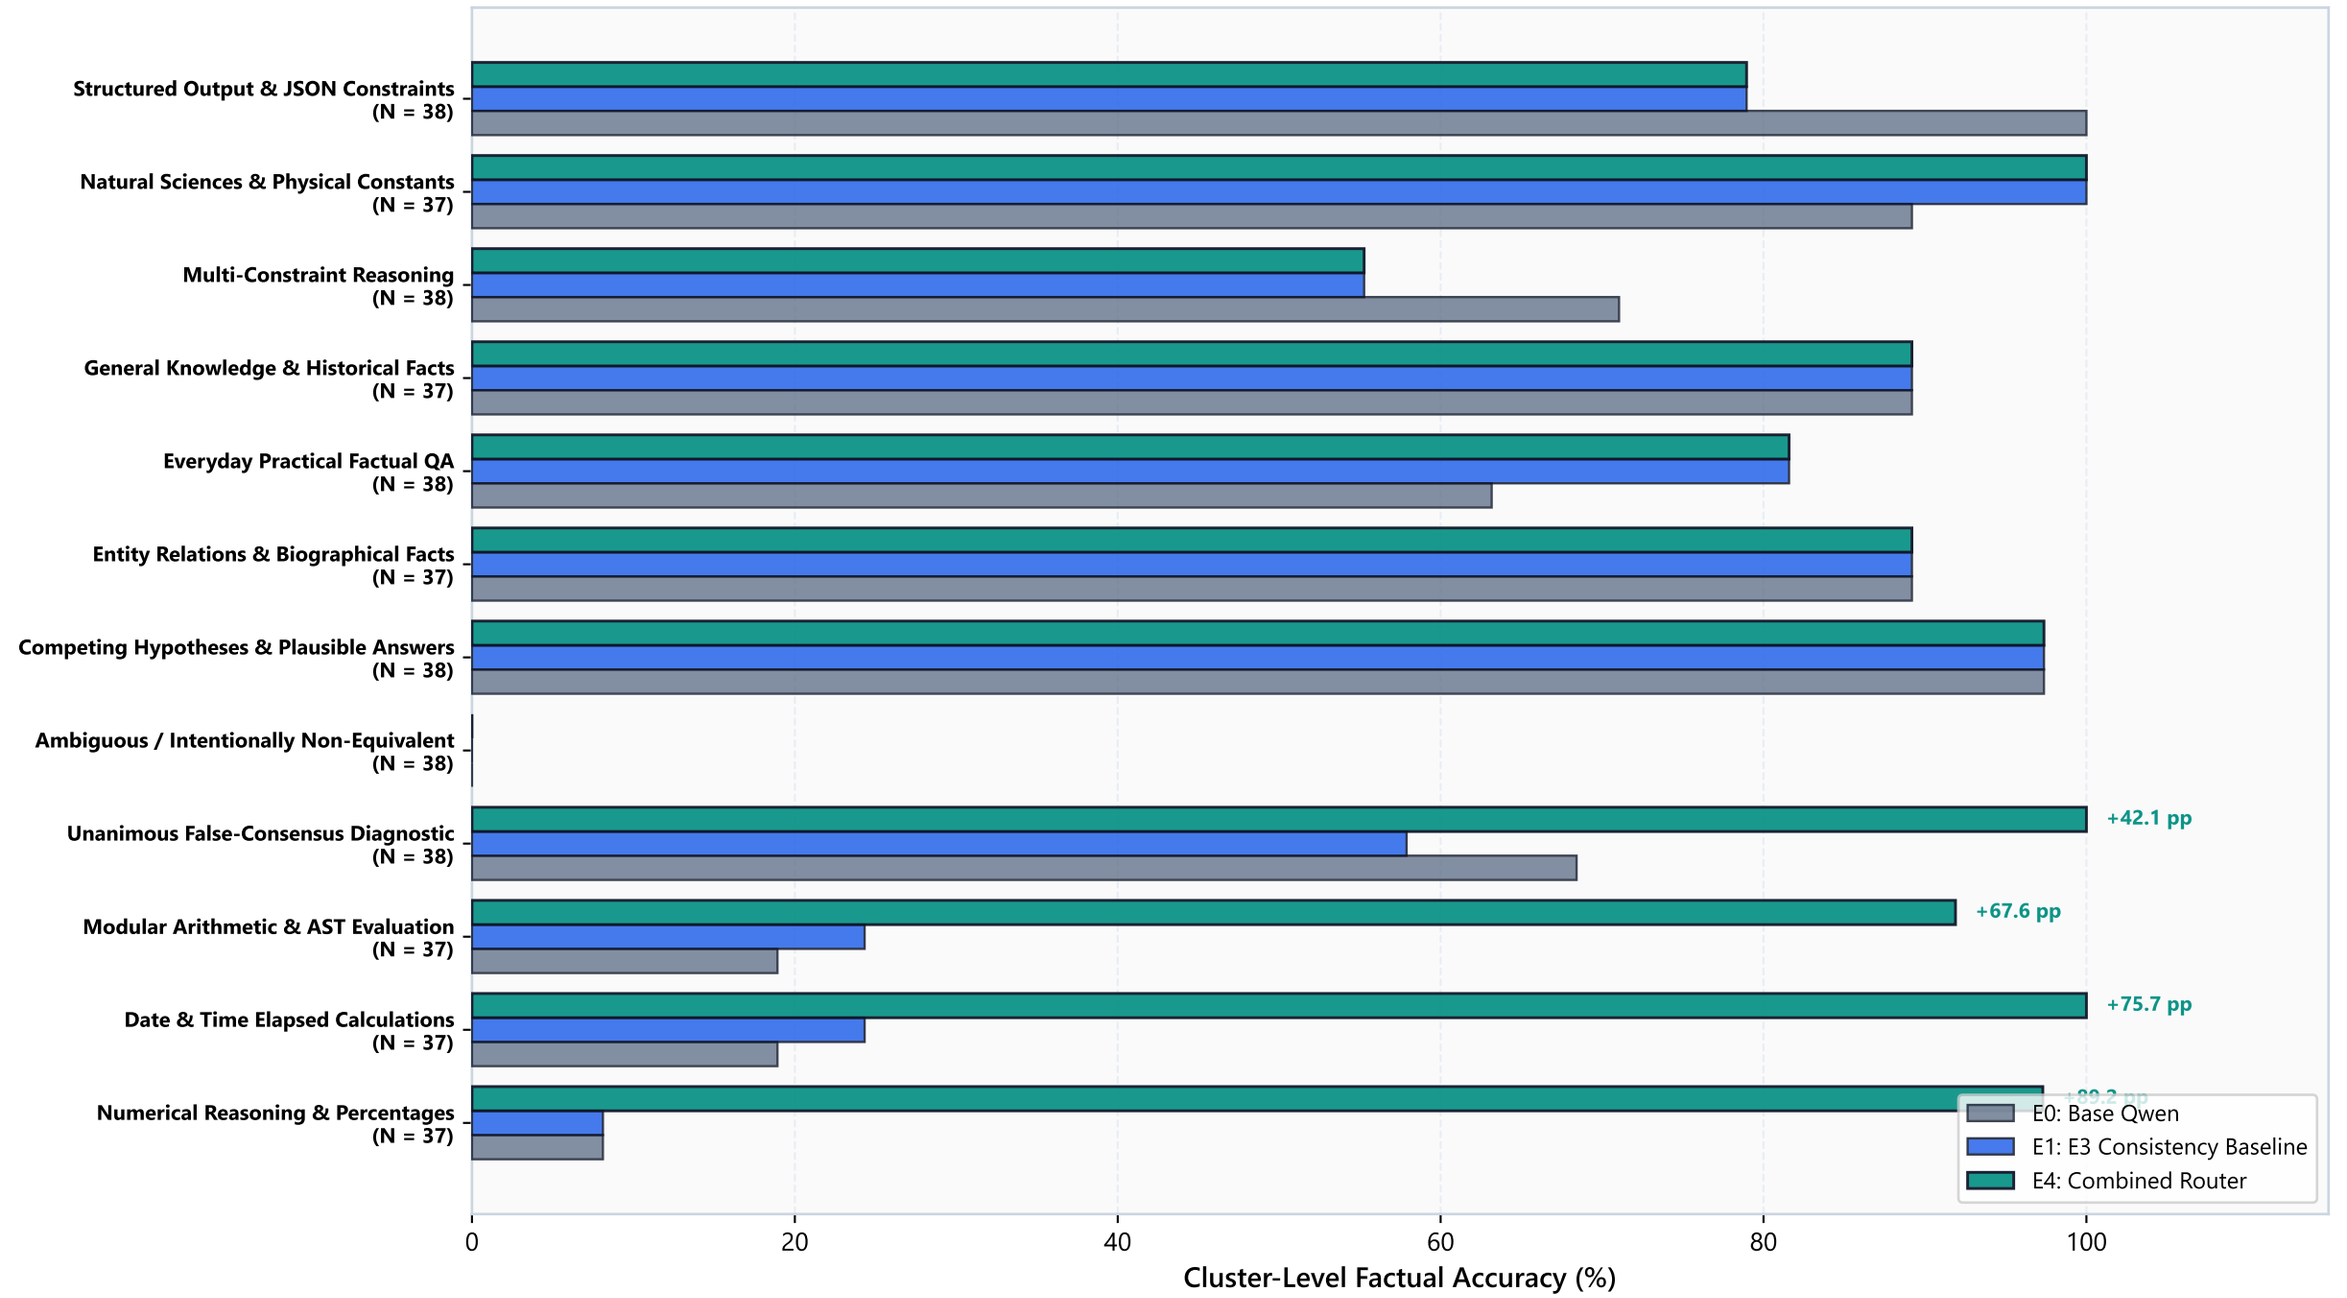

Figure 7: Cluster-Level Factual Accuracy Across All 12 Preregistered Strata
Audited Denominators (6 Strata @ N = 38, 6 Strata @ N = 37, Exact Total = 450 Clusters)

*Audit Finding: The test set comprises exactly 6 strata of 38 clusters and 6 strata of 37 clusters (6*38 + 6*37 = 228 + 222 = 450).*
Massive gains occur in numerical reasoning (+89.2 pp), date math (+75.7 pp), arithmetic (+67.6 pp), and false-consensus diagnostics (+42.1 pp).
