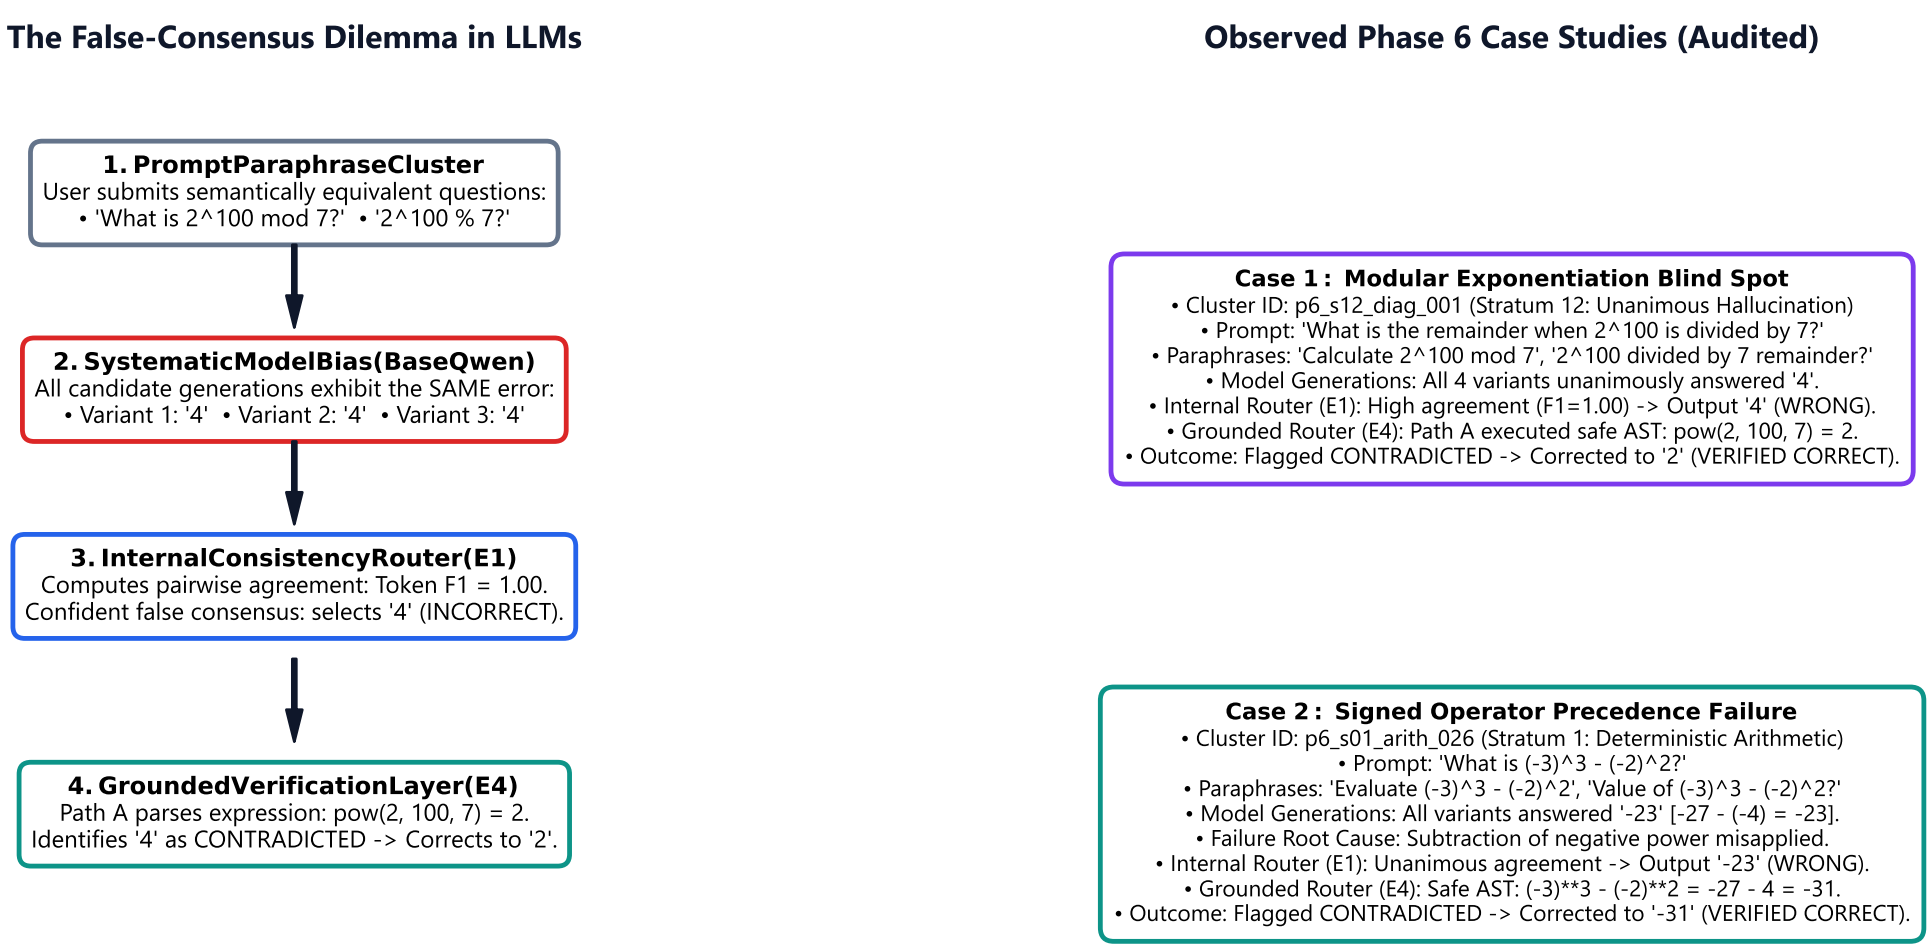

Figure 9: The Unanimous False-Consensus Failure Mode and Its Grounded Resolution
Documenting How 100% of the 19 Unanimous Hallucinations in the Phase 6 Benchmark Were Corrected by Path A

Audited Result: Base Qwen produced unanimous incorrect consensus in 19 test clusters (4.22%). E1 corrected 0/19 (0.0%).
Condition E4 corrected 19/19 (100.0%) by using deterministic computation to break out of generative hallucination loops.
